

# OptoACTIVE™ Earplug

fMRI noise attenuation by 30-40 dB

The OptoACTIVE Earplug is a unique ANC two-way communication system that delivers high-fidelity audio. The head is kept in place using the customized “bagel” inflatable pads.

## Ideal for:

- 7T scanners
- fMRI+EEG in 3T
- Large heads (compatible with Prisma 32/64 channels)
- Adults in any fMRI application
